

The next chapter in the groundbreaking #1 rated Company of Heroes real-time strategy (RTS) franchise thrusts players into a hellish war torn landscape to command two battle-hardened armies in relentless campaigns for honor and country in an all-new stand-alone game.

Powered by the proprietary Essence Engine and Microsoft DirectX 10, Company of Heroes: Opposing Fronts allows players to fight as the tenacious British 2nd Army during the heroic World War II liberation of Caen, France, and command the German Panzer Elite as they struggle to repel the largest airborne invasion in history. Players can battle online in exciting new multiplayer modes with these two all-new armies and utilize full compatibility with the original Company of Heroes for a total of four playable armies.
